Election Report

This is your friendly neighbourhood Math Society Chief Returning officer again. It is time for the summer executive elections. This is when you get the chance to select the summer President, Vice-President, and Treasurer of the Math Society. If you are interested in running for any of these positions, I am sure that any of the current executive would be glad to answer any of your questions about the positions. Drop by the Math Society office (MC 3038) and ask them.

Nominations will open on Mon. Oct. 22^{nd} @ 10:30 am. At'this point, nomination forms will be available in the Math Society office. A nomination requires the signatures of 10 full members of the society. A full member of the Math Society is anyone enrolled in a full time undergraduate mathematics program at the University of Waterloo, who has paid the term Math Society fee (about 99.99% of you have paid said fee on your tuition statement).

The nomination period runs until Mon. Oct. 29^{th} @ 4:00 pm; at which point there will be an all candidates' meeting in the Math Society office (MC 3038). All candidates MUST attend in person, unless they have made previous arrangements personally (as in face-to-face) with the Chief Returning Officer. The campaign period will open Mon. Oct. 29^{th} @ 5:00 pm. All election materials must be approved by the election committee before they are used. The campaign period will run until Wed. Nov. 7^{th} @ 5:00 pm.

The elections will run from 9:30 am to 3:30 pm on Thur. Nov. 8, 1990 and Fri. Nov. 9, 1990. Counting will then take place, and the results will be announced shortly thereafter.

Remember! Your society is only what you put into it.

Impartially yours, Doug Hopkins Math Society Chief Returning Officer Our regular 'Prez Sez' columnist has taken a holiday.

"He's the hero - that's right the hero!!" Coming Thursday, Oct 25 to the Arts Lecture Hall (AL116)... The Rocky Horror Picture Show!!! The first show is at 7:00 pm and for those who have midterms, a show at 9:30pm - so no excuses! Come dressed up as your favourite character and win prize for best costume. Also, fabulous door prizes available to be won!! All this for only one dollar for mathies and two dollars for non-mathies. Tickets are available now in the Math Society office. Math I.D. will be checked at the door. See you there!!!

Witches, ghosts, goblins and more will be here on Hallowe'en cooking you "boo burgers" and "scary sausages" while listening to terrifying tunes. So if you're not too frightened, come out and grab a bite and we'll throw in a tasty Hallowe'en treat for saying "trick or treat."

Jello snorfling, shuffleboard tournament, dart tournament, balloon stomp, musical chairs, and much, much more at the Almost End of Term Pub at the Bombshelter on Friday, November 2. Come out and have a blast!!! Top-notch prizes to be won and admission is free!!! Stay tuned to this column for upcoming events!

> Seema Wadhwa Social Director

Math Grad Committee

The Fun Has Just Begun

Hi there again! Time flies when you're having fun. It's hard to believe that it's already the middle of the term. Think about it: 186 days until the last day of exams in April — basically until we graduate. I'm definitely counting.

By the time you read this article, a whole bunch of things have finished off for the term. Yearbook sales and Yearbook photo blurbs were due on this past Monday; Grad Ring sales finished on this past Monday; Oktoberfest was last friday - a drunken and for some to remain unnamed people a misguided affair; and a successful Pizza Day and Bingo night. Enough of what's done, now what's going on.

There's another Pizza Day comming up and more help would be appreciated. There is a significant piece of information: for every 500 dollars we fundraise, the price of our MGB ticket goes down 1 dollarso come on out and help, it's for your benefit.

A note about the yearbook. Although the order has gone in, there are still a few copies available. The Yearbook is really more like a School Book. In addition to the grad photos, the yearbook has photos from our orientation, the school grounds, the MGB and any other party photos you submit. So, if you don't have one, stop by the Math Grad Office (MC3042) and get one of the few extras we have. Remember, if you have any photos you'd like to see in the yearbook, submit them to the Yearbook people in the Math Grad Office.

As always, if you have any suggestions or ideas, we'd like to hear about them in the Math Grad Office. Let's enjoy our final year!

> The Chair Peter von Schilling

Behind Closed Doors

Ramblings from the other side

A pen dangles from the ceiling, swinging quietly to and fro. A fedora sits on the table.

And there are definitely a few people in the room.

"Macbeth!" is uttered, and suddenly all sharp objects are gathered and hidden.

"If you join the CSC, I'll make you some tea."

"Call Gino's!"

"Will you write something for us? Something funny... Anything!" "You can read the news."

Sitting behind his desk, punching away at the keys of his computer, no longer reluctant [This is untrue. —ed.], the Boss looks up and laughs.

A hot lookin' biker, on his way through to a bridge game, stops and reassures...

"He's harmless"... "You've had all your shots, haven't you?" "Macbeth!"

"Meat, lots of meat!"

"And hot peppers" drifts out of the far corner.

"It's only \$2.00."

Alive, and very busy, Mr. S. sits writing 'something funny'. I'm not sure if that is a look of concentration or pain.

Who's not available in this room?

"There's a lotta white space, guys..."

"Why are you embarrassed? You're a female aren't you?" How dare you say life is dull...

Julia

Waterloo Co-operative Residence Inc. A Housing and Dining Alternative

Features:

- Student built, owned, and operated.
- Five minute walk to the University of Waterloo and Wilfrid Laurier University.
- Low cost accommodations.
- Organized social/recreational activities.
- Residence rooms (single and doubles).
- Apartments (one to four bedroom apartments available).
- Housing is alloted based on membership seniority and application date.
- Meal plans.
- A place to learn and grow.

For further information write to or call:

Admissions Co-ordinator Waterloo Co-operative Residence Inc. 268 Phillip Street Waterloo, Ontario N2L 6G9 (519) 884-3670

New Technique Discovered For Cheating On Exams

The administration was surprised this week when a student was caught cheating during a midterm using a previously unknown technique. Until this event happened, faculty had been convinced that they had seen all possible methods.

Student I.M. Aloser, a math frosh, was nearing completion of the MATH 139 midterm when he was heard to utter an expletive. He was then observed to start eating cookies from the bag of Oreos he had brought to the test, at an indigestion-inducing rate.

The professor for Aloser's section, Dr. U. Vbencot, was interviewed by mathNEWSabout the incident. "At first I had hoped - er, I mean suspected - that he had brought in the cookies as part of an attempt to bribe me," stated Vbencot, whose Oreo addiction is well-known. "When I realised that he had merely brought them to snack on during the test, I was disappointed - er, I mean satisfied."

Aloser's sudden binge near the end of the exam, however, raised Vbencot's suspicions. "At last, I had an excuse – er, I mean I immediately confiscated the bag." Upon examination, Vbencot discovered that Aloser had painstakingly copied delta-epsilon definitions, methods of diagonalising matrices, and the Chinese Remainder Theorem into the Oreos' stuffing.

When confronted with what was left of the evidence, Aloser confessed to the crime. "Yeah, I done it ... and I woulda got away wit' it, too, y'know?" Upon further interrogation, this reporter discovered two things: one, that Aloser panicked when he realised that the lecture hall clock was seven minutes ahead of his own watch and he only had three minutes left to complete the exam; and two, Aloser has an unhealthy fascination with handcuffs. But that's neither here nor there.

The administration had no comment when asked for details on Aloser's punishment, but sources indicated that it may involve forcefeeding of Peak Freans Digestive Biscuits. "Anything but Chinese fortune cookies will do, actually," this reporter was told. "We will definitely be very careful about allowing students to bring Oreos to future exams."

Four Bee Prime

Tom York Memorial Writing Award

Student writers should consider submitting short prose fiction entries to this year's competition for the Tom York Memorial Writing Award. The Award commemorates Dr. Thomas Lee York, chaplain to the University of Waterloo and Wilfrid Laurier University from 1985 until his death in an automobile accident in 1988. York was the author of several novels, including <u>Desireless</u>, published posthumously in 1988.

The deadline for this year's entries is <u>22 November 1990</u>. They may be sent to Dr. Pauline Greenhill, St. Paul's College, University of Waterloo.

Top Ten Senate Filibustering Techniques

- 10. Having pizza delivered during debate.
- 9. Singing nursery rhymes to old Partridge Family tunes.
- 8. Reading Julia Child recipes in iambic pentameter.
- Having Twin Peaks episodes piped in over the public address system.
- Having all Senators' speeches translated into every known language (this is a multicultural society, after all).
- 5. Break dancing in the Senate chamber.
- 4. Singing "I'll Take You Home Again, Kathleen" ad nauseum.
- 3. British Columbia senators insist on going home for lunch.
- 2. Inviting Nancy Reagan in to redecorate the Senate chamber.
- 1. Debating whether they should commence debate about commencing the debate (learned from Mulroney government during Free Trade hearings).

Four Bee Prime

Top ten-page issue

10 Completely True Facts About the Toronto 1989 Phone Book

- There are 1973 pages of listings. (Which coincencidentally is the year that "The Sonny and Cher Comedy Hour" rose and fell in popularity)
- 9. The first entry in the listings is "A" at 10 Kodiak Cr. (Which coincidentally is the solution to the last proof I did in algebra)
- 8. The second entry is "A' Nursing". (Which is the answer I gave for the last proof I did in Algebra)
- 7. The last entry is "Zzzilch". (Which coincidently is the mark I got on my last Algebra proof)
- 6. There are 78 entries beginning with "Dial". Of which 5 are people, and 28 are "Dial-One" (broken up into catagories - the most interesting of which is the catagory "Solar Systems - Solar Instalation" Wanna red giant in your back yard?), and an alphabetical sequence of "Dial-a-drink" and "Dial-a-Jewish Story".
- 5. There are 3627 entries for Wong. (prove me wrong bad pun)
- 4. There is one entry for Wompa. (I won't touch this one)
- There are 4 Deaths ("Pronounce it Deeth" "Yeah, right"), PLUS
 6 "D'Eath", 2 "DeAth", 4 "De'Ath". (They are trying to dodge the proper pronounciation.)
- 2. There are 12 possible Trevor Green listings. (We'll find that editor yet!)
- There are, (Are you ready? Are you ready?) 3 "Math" entries (Which are: "Peter H Math of 100 University", "Peter H Math of 260 HealthW" and "B A Math of 25 Willowbank")
 - D '1 D .

Top Ten Things to Do While Waiting in Line at the Bank in the Campus Centre

- 10. Factor 400 digit numbers on your HP 28S.
- 9. Solve the halting problem for a few of your favorite programs.
- 8. Unify the fields.
- 7. Read War and Peace.
- 6. Write something bigger and better.
- 5. Age some wine.
- 4. Try to pick up the person in front of you.
- 3. Marry that person.
- 2. Have kids.
- 1. Raise them to be productive members of society.

Bob

Artsie's View Of A mathNEWS Production Night

"Free pizza! Sure. I'll help!" and that's how it all began. The next thing I discovered was that they expected me to do something for the pizza. (Can never trust a mathie, can you?) This was simply the first of the many nightmarish conditions under which these slave drivers expected my creative juices to flourish. The office was an interior decorator's vision of Hell. Pink, beige, off-white, yellow, orange, green ... my God, it looked like Walt Disney had OD'd on Ex-lax. The music was pretty good, but there was a serious lack of partners to enjoy it with. Of the two there were, one was taken and the other was talking to someone else. I sighed, longing for the security of an Arts class where the females dominated (but those details are going into Imprint).

My captors threw me onto the couch, thrust a mechanical pencil into my hand and barked "Write!" at me. My mind reeled, pizza fumes teased my senses and the growling in my stomach began to provide counterpoint to the music (thank God, they weren't playing thrash or I'd have died). Slowly I began to mull over old essays, hunting for a quick and easy topic. Pizza was waved provocatively under my nose. Somebody asked me if I did Coke (TM). My head swam with cliches, puns, lines so old that even engineers knew them. Quotations from Shakespeare, Milton, Donne and Spenser floated before me. I began to compose a short but brilliant piece of prose filled with allusions, transferred epithets, pathetic fallacy and extended metaphors. Proudly, I handed this literary pearl to my jailers and looked hungrily at the pizza. Imagine my surprise when these "MathNewts" threw my prize piece of literature back in my face screaming, "This isn't acceptable. We're mathies, and mathies are our audience. They won't understand all these big words (4 letters or more). Try it again, Artsie." I swore under my breath, lowered my vocabulary to a plebian level and began again. "Free pizza ... sure, I'll help."

Can We Talk?

Are you brave? Are you strong?

Are you concerned about the environment?

Have you noticed a group of crusaders outside the C&D every Wednesday? Well, it doesn't matter! Every Wednesday at 10:00, the recycling committee takes to the third floor, and you could be a part of it all. We need people to keep an eye on, and empty cans when needed, and drivers/cars to take those black monstrosities to the dump/recycling depot. Just talk to Karen Smith or leave a message in MathSoc, and you too can have fame, fortune, and the recognition you always wanted. Recycling works only if people get involved; don't count on others to do your share. All it takes is a few moments a day.

If you would rather remain inconspicuous and keep a low profile, you can help by placing your newspaper, cans and glass in their appropriate containers located in and outside the C&D and in the DC Foodfair. It is very important that these items get put in the correct bins. If the white paper bin contains even a few, as few as two or three, non-white items, it is degraded to ordinary paper. The white "blue boxes" in classrooms have been found to contain items other than white paper; this results in the material in the box ending up in the garbage. A single careless person throwing out such items can wipe out the efforts of undreds of other people with deadly effectiveness. If you belong to this tiny section, please stop recycling immediately. A lot of recycling material gets rejected because of contamination.

Recycling is only one part of what you can do though. It is also really important to reduce and reuse. You can do these by using a mug for coffee/tea instead of coffee cups (they will be available soon from MathSoc), writing on both sides of paper, avoiding excessive print-outs and photocopying, reusing paper and plastic bags. In general, be aware of what you use, and make use of all available recycling programs. The school recycles fine white paper. MathSoc recycles plastic pop bottles, glass bottles, tin and aluminum cans, newspaper, cardboard, and coloured paper. There are no facilities yet for waxed/glossy paper or hard plastic. For those of you who have new ideas or comments please contact Karen Smith at MathSoc.

Karen Smith, Recycling Director

Remember, MathSoc uses recycled paper in the photocopiers. And you can use your own reclaimed paper too.

Lisa Says:

My apologies to all you Actsci Club members who have been mobbed by mathNEWSreaders wanting to "hang out with you." Much thanks to Colin of the PMC for allowing us to win the baseball challenge (your cheque is in the mail). It was a close game and gratitude is extended to Liam for his high-tech scorekeeping: three grape juices and nine empty cups on our side; a Pepsi and a miscellany of seven other cans for them. For those of you not inclined to solving logic puzzles, the final score was 39 to 12. (Yes, we trounced them.)

"Managing Microsoft people is like trying to herd cats."

Seim, PSYCH 213

The Multiple Answer (and Short Choice) CSC Flash

in which ongoing, upcoming and bygone events are discussed, math-NEWSmacros are abused, and tea and doughnaughts are mentioned several times

- 1. On October 22nd, David Maritz, a Systems Development Manager from **Microsoft** will give a presentation, at 7 pm, in MC 4020, on a topic to be announced. The talk will be technical in nature, but Dave will also discuss the Microsoft working atmosphere. Tea and doughnaughts will be served. Answers are:
 - (a) because you are interested in computer science,
 - (b) because you might be interested in working for Microsoft, or
 - (c) because you like tea and doughnaughts and what else are you going to do on Monday night?

Vapid Fire

Fools on the Hill

- In late-breaking news from the Red Room (the one on Parliament Hill, not MC), Senators from the Ottawa region have finally finished reading the Ottawa telephone book to the Senate. Debate is expected to finish some time next universe-lifetime.
- In a press conference, German Chancellor Helmut Kohl and Iraqi general Saddam Hussein announced their plans to re-unite Germany with Austria this year, followed by Czechoslovakia next year combined with a lightning annexation of Poland. President Bush admitted "some concern" with the concept, and announced that he was sending forces to block the Persian Gulf.
- In an attempt to boost sagging Québecois morale, the FLQ have claimed responsibility for the shooting last Monday of 21 Palestineans in Israel, and they have invited the UN to Quebec City to conduct an investigation into the killings.
- Mikhail Gorbachev went to Stockholm this week to claim his Nobel Peace Prize. When asked how he was going to spend the multimillion-dollar prize, he mentioned he was using it to cover Raisa's American Express bill.

to 245 Lester St. C.O.D. not accepted. Random numbers for sale. Cheap. Willing to trade for constants.

Al U.

to mathNEWS: If you ever want to see your editor again, send \$50 (plus GST) to: Hostages 'R' Us (a division of Islamic Jihad Inc.), Behind the second soap dispenser, Men's Room, Fed Hall.

•On October 30th, various CS profs will be in MC 2065 to describe their 4th year courses, at the **3B Info** Night. Answers are:

- (a) because you are interested in passing computer science,
- (b) because your program doesn't count Rec 433 (People in Natural Areas) for fourth year credit.
- (c) why should you take course advice from coffee-addicted, sleep deprived fourth year students, when you can get it from the informed profs who actually think their assignments are reasonable?
- (d) because you like tea and doughnaughts, which will be available..

• The Dean of Math, the Fed President, the infamous Johnny Wong and CSC executives met Monday to discuss the CSC's intention to acquire an alt feed. Answers are:

- (a) the earth is losing momentum and will eventually spiral into the sun,
- (b) progress is being made.
- 2. What may be the Canadian Open Computer Othello Championship will take place on November 17th. Answers are:
 - (a) write a computer program that plays Othello
 - (b) any language you like. Even COBOL.
 - (c) because you could win fame and a trophy and ...
 - (d) tea and doughnaughts might be served.

The short choice is: "should mathnews have a tea and doughnoughts macro, or would the CSC flasher who writes for math-NEWS only abuse the tea and doughnoughts macro the way the mathNEWS macro is already abused?"

SCUNT!!!

It is that time of the term again ladies and gentlemen. Time for the engineer's Havenger Scunt, this year presented by Enorgy. The theme of the Scunt this term is The Silver Screen. The event takes place on Friday November 9th and Saturday November 10th. The Scunt will start sometime Friday afternoon, and the judging will conclude on Saturday afternoon sometime. If you want to join the Math team, Math Hysteria - call our fearless leader at 725 - 0634, ask for more information. Leave a message if she is not in. Or, e-mail at mabuckley@orchid.

adam

Logic Puzzle Number Two, eh?

Hey, five submissions. Not bad, considering it's a new concept and a fairly easy puzzle to boot. Now this one should be a little tougher, although laid out for easier understanding. Point form and all, you know, but no grid this time. But on to last week's winners:

It seems only three of the five actually got the puzzle right, these being Death by Calculus II, Joe Engineer, and THE DEMENTED SLINKY OF FROBOZZ. A random die roll declared Joe the winner, and he is welcome to come by the Math Society office some time and collect his prize: a most glorious coupon for the Math C&D. Perhaps our food will convince him of the error of his program selection!

After discussing interesting things like froshly peregrinations, and how many posters they'd torn down that day, the security guards of two issues ago went home to relax before going to bed. Oddly enough, they all did the same thing: ate a non-descript dinner while listening to CKMS, them watched TV, drinking a beverage. Given the following clues, what can you tell me about Bruce, who listened to "Who Are You Anyway?" Again, the winner will be randomly selected from all correct entries in the BLACK BOX by 29 Oct.

Clue: pertinent data include the guard's name, the group and song he listened to, and the beverage and TV show he consumed afterward.

- 1. After listening to Red Deer play "C&O 230," Bruce marveled at how the infamy of a UW math course had reached as far as Alberta; but his wife klopped him, saying that Red Deer was actually from Cambridge. Grumbling, he sucked back some more beer.
- Bruce once heard that an actor on The Flash worked on "Yeah, Yeah, Yeah" with Achilles and the Tortoise. After listening to that song, he turned to the show to see if it was obvious.
- Bruce always drank water, but after listening to "Beat Me to a Pulp" decided to watch The Simpsons instead of his usual Red Dwarf.
 - 4. It is well known among UW security guards that people who drink beer watch only Twin Peaks, The Simpsons, or Star Trek: The Next Generation, and that it is impossible to watch Twin Peaks or Star Trek: The Next Generation after listening to Left Ankles.
 - Bruce, who had the milk (since he was out of cola), always enjoyed Cogito Ergo Something's material, and was glad to hear it that night.
 - 6. Ten recorded "I Have to Be in Bed," but after listening to the song, Bruce didn't know why.
 - Another well-known fact was that cranberry juice went astoundingly well with Twin Peaks.

Same guy as last time.

mathNEWSquiz #4

Well, this week we have the results from two weeks worth of squizzes for you. First the answers for volume 54, no 2: 1. Joey Ramone, 2. Ilya Nikovitch Kuryakin, 3. Bambi's Revenge, 4. Griddies

Hey dudes and dudettes... the gridmaster has managed to catch the cold that's going round, so gridcoms will be short today. Last week's winners for the cryptic and conventional were, in no particular order, Rhiannon-Sue T'Srewat-Jones and Sudo Nim. They can pick up their prizes at MathSoc.

Submissions for this one are due Oct 29, under the mathNEWS door or in the BLACK BOX. Include your pseudonym, comments, and favourite drug. Bonus marks for guessing the themes (both cryptic and conventional have one), the significance of 1 down in the cryptic or 23 down in the conventional, and the gridmaster's favourite drug (hint: consider the gridmaster's state of health at this writing).

That is all. Enjoy.

the snark with help from Ragnar Ragnarson

Conventional

Cryptic on Thorazine

Across

1. Opium derivative

- 4. Injecting 7. Split 9. Snarky 11. Weak 13. Bowward 15. Utensil 17. Pre-... 19. Swords 22. "Almost like 24. Moray 26. Place 28. Brick 29. Synonym for 9 Across 30. Done
